

# E-commerce

- Buying and selling online
- Involves websites and apps
- Examples: Amazon, eBay, daraz
- Goal: Reduce costs, improve service

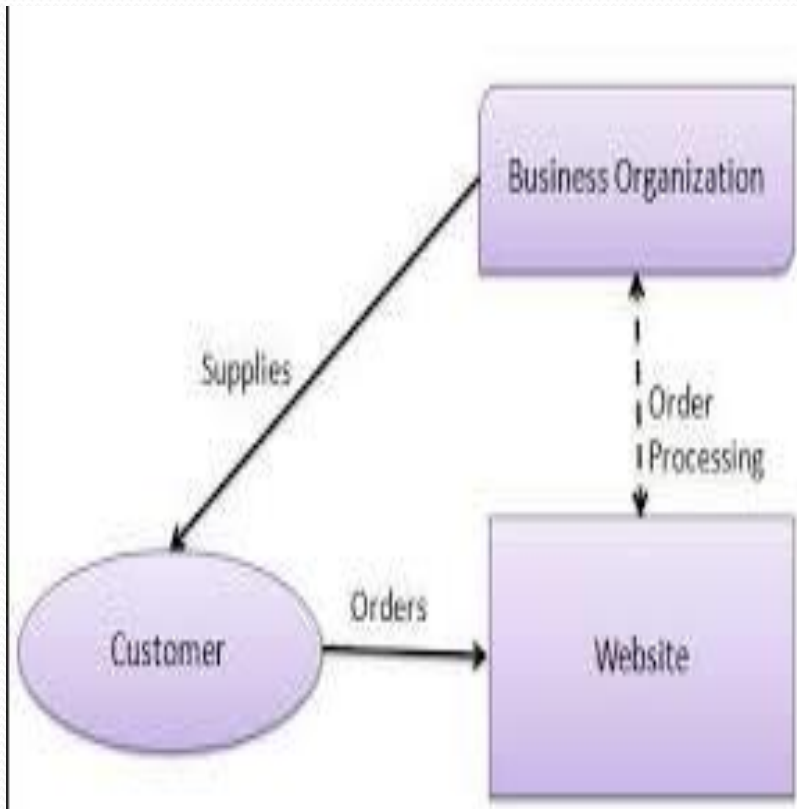

# Types of E-commerce Models

- Business-to-Consumer (B2C)
- Business-to-Business (B2B)
- Consumer-to-Consumer (C2C)

# 1. B2C (Business to Consumer)

## Characteristics of B2C E-commerce

- Direct interaction between businesses and consumers
- Personalized marketing to enhance customer engagement and loyalty
- Expanded market reach through e-commerce platforms
- Customer feedback shapes product development and improvement

# Business-to-Consumer (B2C)

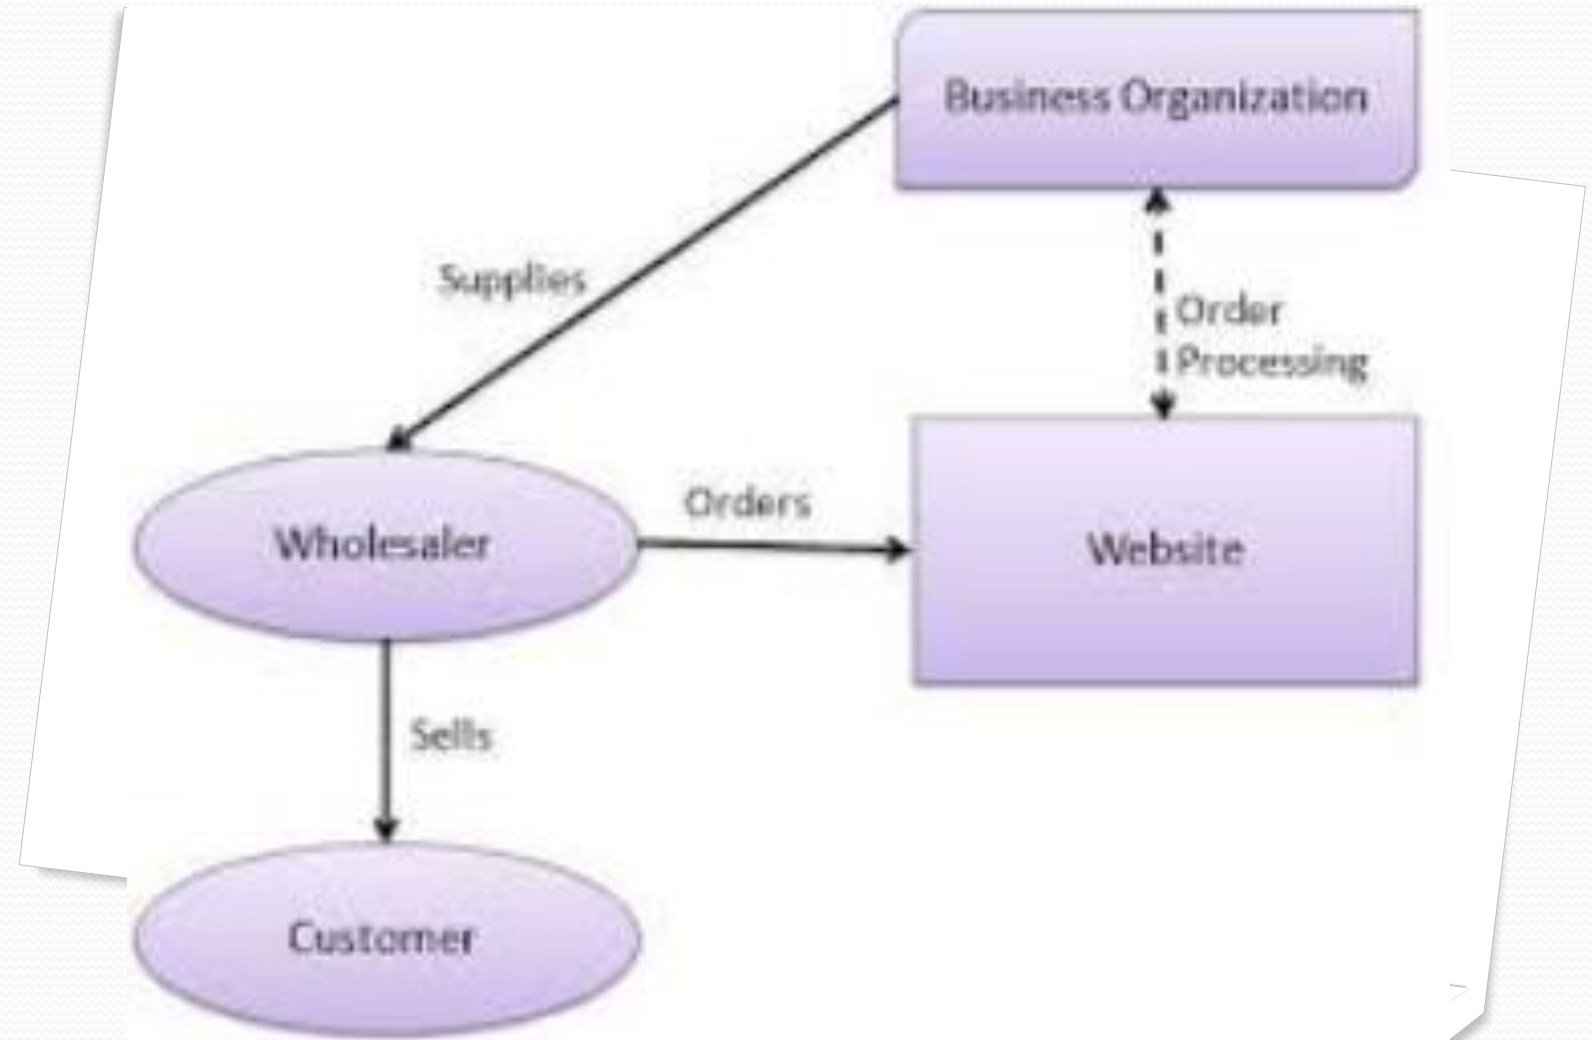

- Global reach enables access to diverse markets.
- 24/7 availability increases convenience for consumers.
- Personalization enhances customer satisfaction and loyalty.
- Data-driven insights improve marketing strategies effectively.

# Business-to-Consumer (B2C)

## Examples

- **Global Reach:** Amazon sells products worldwide, reaching millions.
- **24/7 Availability:** Etsy allows shopping anytime, day or night.
- **Personalization:** Netflix recommends shows based on viewing history.
- **Data-Driven Insights:** Alibaba analyzes customer behavior for targeted ads.

## 2. Business-to-Business (B2B)

# Business-to-Business (B2B)

- **Online Transactions:** Businesses sell products or services to other businesses via online platforms.
- **Efficiency Improvement:** Streamlines ordering and payment processes, reducing reliance on manual sales efforts.
- **Long-Term Relationships:** Typically involves ongoing relationships with clients, often characterized by bulk purchases and negotiated pricing.
- **Complex Procurement:** Often includes multiple decision-makers and requires tailored solutions to meet specific business needs.

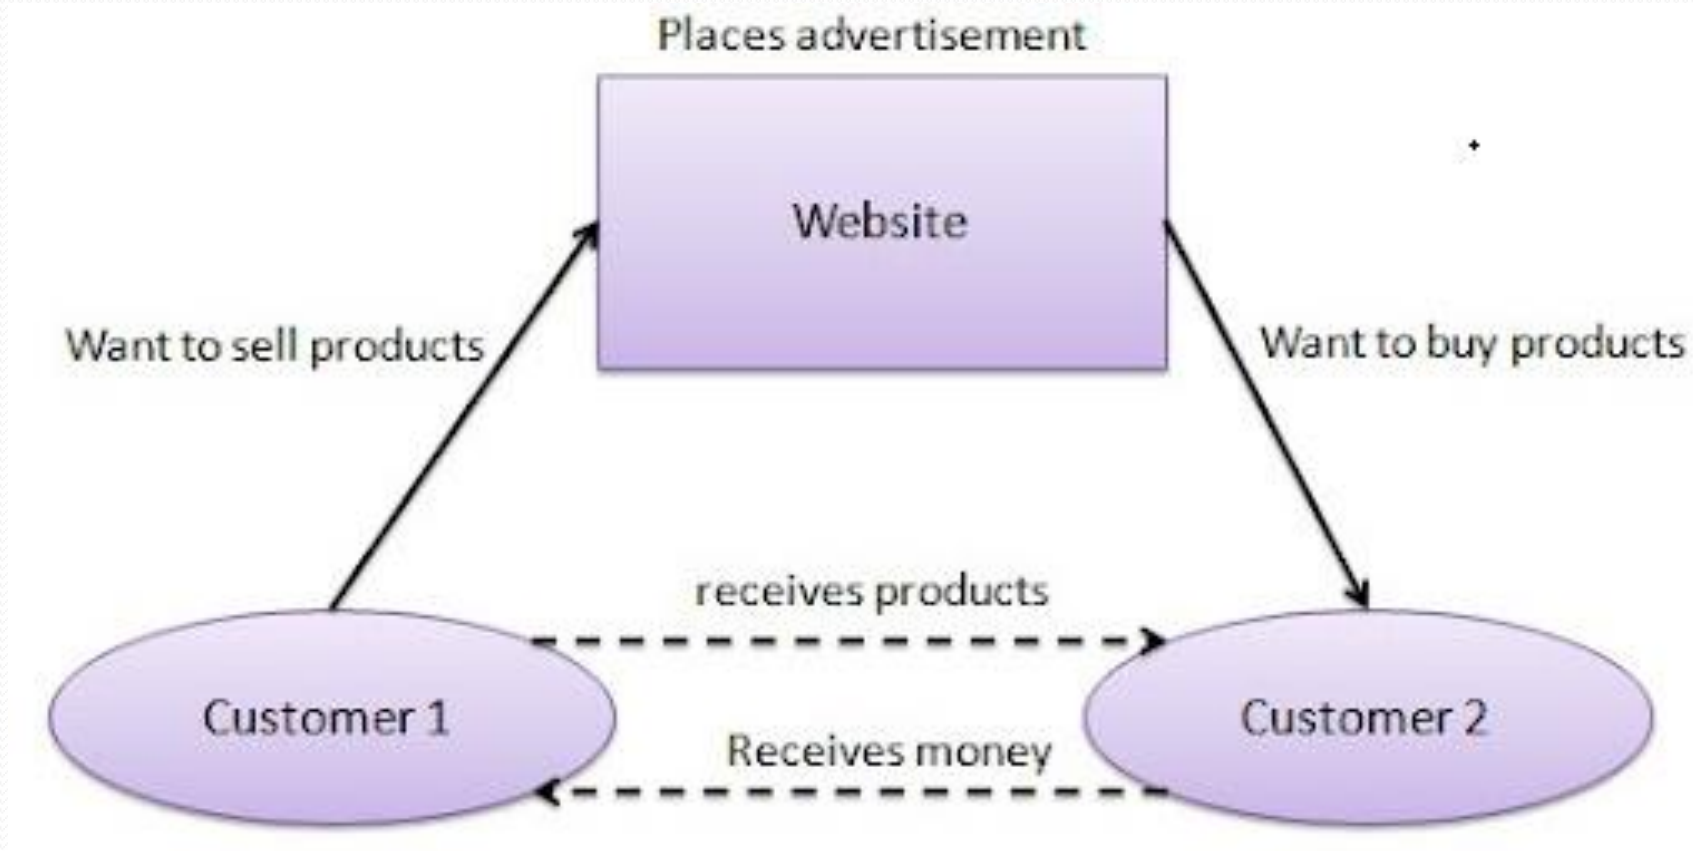

# B2B (Business to Business) e-commerce

## Examples of B2B e-commerce platforms:

- **Amazon Business:** A division of Amazon that caters specifically to businesses, offering bulk purchasing options and business-only pricing.
- **Alibaba:** A leading global B2B marketplace connecting suppliers and buyers, primarily focused on wholesale transactions.
- **Salesforce:** A cloud-based CRM platform that provides businesses with tools to manage customer relationships and sales processes.
- **Microsoft:** Offers a variety of software and services for businesses, including cloud solutions and enterprise software licensing.

### 3.Consumer-to-Consumer (C2C)

# Consumer-to-Consumer (C2C)

- Consumers sell products directly to other consumers.
- Online platforms facilitate transactions between individuals.
- Low-cost entry for sellers and buyers alike.
- Includes auctions, classifieds, and peer-to-peer sales.

# Consumer-to-Consumer (C2C)

## Examples

- eBay: Auction site for consumer-to-consumer sales.
- Hamrobazaar: Classified ads for local buying and selling
- Craigslist: Classified ads for local buying and selling.
- Etsy: Marketplace for handmade and vintage items.
- Airbnb: Individuals rent out their properties to travelers.
- Fiverr: Freelancers offer services directly to consumers.

# Advantages of E-commerce

- Increased reach and access
- Cost-effective operations
- 24/7 availability
- Competitive pricing opportunities

# Disadvantages of E-commerce

- Security risks for transactions
- Lack of personal interaction
- Potential data breaches
- Reduced customer loyalty

# Introduction to M-commerce

- Buying and selling via mobile devices.
- Includes transactions on smartphones, laptop and tablets.
- Encompasses mobile payments and in-app purchases.
- Provides convenience and flexibility for users.

# Examples of m-commerce

## 1. Mobile Shopping

- Daraz: Leading e-commerce platform offering a wide range of products
- Sastodeal: Popular online shopping site for Nepali consumers
- Muncha: Offers a variety of products including electronics, fashion, and home décor

# Examples of m-commerce

## 2. Mobile Banking

- Provides mobile banking app for account management and transactions
- Offers mobile banking services for secure fund transfers and bill payments

# Examples of m-commerce

## 3. Mobile Payments

- eSewa: First and largest mobile payment gateway in Nepal
- IME Pay: Allows mobile money transfers and payments
- Khalti: Digital wallet and payment app for online transactions

# Examples of m-commerce

## 4. Mobile Coupons and Loyalty Programs

Foodmandu: Food delivery app that offers mobile coupons and discounts

INdrive: Ride-sharing app with loyalty rewards for frequent users

Pathao: Provides mobile coupons and offers through their app for bike rides and food delivery

# Advantages of M-commerce

- Convenient shopping experience
- Accessible from anywhere
- Expands customer base
- Seamless transactions

# Disadvantages of M-commerce

- Security risks persist
- Limited screen space issues
- Challenging product display
- Potential for user frustration

# Online Payment Methods

## 1. Credit Card Payments

- Widely accepted for online purchases
- Require entering card details like number, expiry, CVV
- Offer consumer protection like chargebacks
- Examples: Visa, Mastercard, American Express

# Online Payment Methods

## 2. Debit Card Payments

- Directly deduct funds from a bank account
- Require entering card details like credit cards
- Offer less consumer protection than credit cards

Examples: Visa Debit, Mastercard Debit

# Online Payment Methods

## 3. E-check or Electronic Check Payments

- Authorize direct bank account withdrawals
- Provide bank account and routing numbers
- Offer lower fees than card payments
- Examples: eCheck, ACH payments

The diagram shows a check from Jane Doe, 1234 Main St. Apt 101, Lenexa, KS 66215, with check number 1001. The check is payable to the order of 'Your Bank' at the same address. Below the check, three data fields are identified with green circles and arrows: the Bank Routing Number (123456789), the Bank Account Number (1234567), and the Check Number (1001). The check number is crossed out with a red circle and a diagonal line.

123456789	1234567	1001
Bank Routing Number	Bank Account Number	Check #

# Online Payment Methods

## 4. Digital Wallet Payments

- Store card details for one-click purchases
- Provide an extra layer of security
- Offer biometric authentication options
- Examples: eSewa, Khalti, Apple Pay, Google Pay, PayPal

# Online Payment Methods

## 5. Crypto currency Payments

- Use decentralized digital currencies
- Provide anonymity and irreversibility
- Require a crypto currency wallet
- Examples: Bitcoin, Ethereum, Polkadot

# Advantages of Online Payment

- Anytime, anywhere transactions
- Faster, easier large payments
- Higher payment security
- Reduced risk of theft

# Disadvantages of Online Payment

- Third-party service charges
- Limited shop acceptance
- Privacy concerns exist
- Risk of hacking and fraud
